

THE WORLD OVER

LURE HUNTER WITH PHEASANT

VICTORIA, B.C.—Just an hour after the game bird season opened last week, William Kerey's "puck" pheasant Archibald was shot—for the 100th year. But Mr. Kerey only laughed. Archibald is a bird he shot and studied years ago. Each year he is placed by the roadside to lure unwary hunters on opening of the season.

BENES TO LECTURE IN THE U.S.

CHICAGO—President Robert M. Hutchins of the University of Chicago announced Monday Edward Benes, former president of Czechoslovakia, had accepted an invitation to become a visiting professor at the University. Dr. Hutchins said details of Benes' visit and the date of his arrival in the United States had not yet been determined.

LABOR WINS IN NEW ZEALAND

WELLINGTON, New Zealand.—The Labor government of Prime Minister Michael Savage celebrated a clear-cut victory Sunday night, and its leaders, noted for their advanced social legislation, began consideration of a program for a second three-year term.

Final figures on Saturday's election gave Labor 54 seats, Nationalists 24 and Independent two, of which one is expected to support the government and one the opposition.

Three years ago in the last election for the House of Representatives, the Labor party won 52 seats against 20 for the Nationalists and eight for the Independents.

For the first time Labor polled more than half the votes.

TO ENFORCE CONSERVATION

The Alberta Petroleum and Natural Gas Conservation Board will take steps immediately to prosecute Turner Valley gas well operators who are not complying with the board's rules to cut gas production in the Valley to 40,000,000 cubic feet per day.

On Saturday the first trial of a legal battle over the conservation order, which went into effect Saturday at 8 a.m., when Mr. Justice W.C. Ives of the Supreme Court dismissed an application of Mercury Oils Limited to have the order declared null and void.

LOCAL NEWS ITEMS

Mr. and Mrs. H. C. Willson and family and Mrs. W. H. Williamson motored to Drumheller Saturday.

Karl Seimons of Pennant, Sask., arrived in Carbon Friday morning to attend the funeral of the late Mary Skerry. During his stay in Carbon he was the guest of Mr. and Mrs. Frank Skerry.

Mess Jean White and Mr. Rose Dunlop were married at Drumheller last Wednesday, October 12th.

Those attending the funeral of the late Mary Skerry in Calgary Monday were Mr. and Mrs. Jas. Flaws, Mr. and Mrs. S.J. Garrett, Mr. and Mrs. Alex Reid, Mrs. J. Skerry, Mrs. Frank Emery, Mrs. Wm. Reid and family, and Mrs. Margaret Reid and family.

BOY SCOUT CARD PARTY

FRIDAY NIGHT DRAWS

LARGE CROWD HERE

C. H. Nash Addresses Gathering On Scout Activities

The Boy Scouts and Wolf Cubs of Carbon district held a very enjoyable card party on Friday night in the I.O.O.F. Club rooms and a large crowd turned out for the occasion.

Prizes for bridge were high, Mrs. Leth and R. Skerry; Low, Mrs. Canings and Harry Evans.

For whist, Mrs. Gracie and C. H. Nash had high scores, while Mrs. J. Flaws and Frank Barker took the consolation.

Raffle winners were as follows: The show donated by Mrs. Flaws was won by Mrs. McKinley. Flour donated by C.H. Nash was won by Mr. Dunham of Orkney. Cabinet donated by George Ives was won by F.R. Cole of Ghost Pine. Chickens donated by Frank Skerry were won by Mrs. Jung of Orkney.

Jas. Flaws was credited with selling most of the remaining tickets.

Following the drawing Mr. C. H. Nash gave a short talk on behalf of the Scouts and then refreshments were served, bringing to a close a most successful entertainment.

LONG YEARS AGO

October 20, 1927

Mr. Baird is having the building behind the pool room repaired and furnished and when completed the Scouts and then refreshments were served, bringing to a close a most successful entertainment.

An added attraction at the Carbon theatre this week will be the Dempsey-Sharkey fight pictures.

The plastering has been completed on Len Poxon's new bungalow and the stucco building now presents a fine appearance to that section of the town.

With fine weather the past few days harvesting has gone ahead with great rapidity and now over 60 per cent has been completed in this district. The yield is particularly good and in some cases as high as 60 bushels to the acre is reported. The grade is average No. 2.

Final payment by the Alberta Pool was made this week and for the 1926 crop Pool members received \$1,384, per bushel, No. 1, Northern.

Work has commenced on the new county link and volunteer labor will be used as much as possible.

Place your orders now for future delivery of Counter Check Books. We are direct factory representatives. The Carbon Chronicle.

VILLAGE STREETS IMPROVED

Gild Gimble has the Municipal grading in town and the first of the week the streets of the Village were all gone over and greatly improved. Carbon streets are now considered the best of the small towns in the province and it is to be hoped they will be kept that way.

CLARENCE H. TADE IS SOCIAL CREDIT CANDIDATE FOR ATHABASCA

By-Election to be Held in North on Monday, November 7

Clarence H. Tade was chosen at a meeting at Collington Monday night as Social Credit candidate for the Athabasca provincial by-election to be held on Monday, November 7.

The Collington farmer won for Social Credit in the 1935 Alberta general election, being re-elected to give a seat in the legislature to C.G. Ross, former Minister of Lands and Mines, whose death a short time ago made the by-election necessary.

The choice was made by the selection committee of the provincial government—Premier Abernethy, Hon. R.E. Tansey, Minister of Lands and Mines, and Hon. Lucien Maynard, Minister of Municipal Affairs—and an advisory board of Athabasca riding Social Crediters.

Electoral action close on October 28th, and to date C.J. Rayner Whiteley of Collington is the only other candidate to have been named by the Liberal choice to contest the seat.

LITTLE ITEMS OF LOCAL INTEREST

Mr. and Mrs. Albert Schell have moved into their new house purchased recently from Jas. Ramsey.

Mrs. M.J. Elliott spent last Wednesday and Thursday in Calgary.

Herb Richter of Trochu was a Carbon visitor Monday.

Wilfred Skerry is back in town after spending the past year in the Rimby district. He came down from Rimby Sunday night with Herb McGrady.

Heavy frost was prevalent for a few days last week, although the weather warmed up a little on Tuesday. The days have been bright, but cold and old timers say we still have our Indian Summer to come.

George Hoff has contracted Scarlet Fever.

Mess Betty McQuade of Calgary spent Friday and Saturday visiting with friends in Carbon.

Mr. and Mrs. Len Poxon and Mr. and Mrs. S.F. Torrance were Calgary visitors the first part of the week.

Mrs. Johnstone of Calgary is visiting in Carbon with Mr. and Mrs. A.J. McLeod.

The Charlie Pattison family have moved into town for the winter and have taken the house next to the Masonic hall.

Mrs. John Greig and family left last Tuesday to make their home at Hinton.

Mr. and Mrs. Clyde Sobey and family of Fintonaugh spent last Sunday and Monday at the home of Mr. and Mrs. H. T. Sobey.

Miss Inez Sobey and Miss Norma Williamson have returned to their homes in Carbon after spending a week in Corralton.

LESS WORK—MORE FOOD

The average American workman who labor only 18 minutes for a pound of bacon would have to work at least twice as long to make a similar purchase in most any foreign nation, a survey of comparative buying power and wages has shown.

For example, the Englishman would have to work 45 minutes at the prevailing wage, the German 59 minutes. The same ratio applies to all standard products, the survey shows.

In this respect, a market basket filled with one pound of bacon, one pound of beef, one pound of butter, one pound of bread, one pound of potatoes, one dozen eggs, one quart of milk and one pound of sugar would represent 1 1/2 hours of labor by an American industrial worker at the prevailing wage average. For the same grocery order the Englishman would need 3-4 hours, the German seven hours and the Belgian 14 hours.

—The Sunbelt Courier.

SWALLOW FOWL SUPPER

DRAWS GOOD CROWD

People Present From Acme, Carbon, Three Hills, Granger, Swallow

It was a gala evening up at Swallow on Wednesday of this week (Oct. 12) when the country-side gathered with folk from Carbon, Three Hills, Granger and Swallow. The chicken supper left nothing to be desired (and it might be medical attention during the wee small hours) for the ladies provided ample of everything—especially at the early tables. Following the supper in the basement of the church, the people gathered in the church auditorium to enjoy a concert which had everything! Opening with the singing of O Canada, musical numbers featuring songs, instrumental, duets, etc., succeeded one another in rapid succession with recitations and short speeches for an hour and a half—Acme-Swallow.

THE WORLD OF WHEAT

REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

"These Registered and Certified seed growers seem to ask a pretty good question for their seed, but there's some way to get it cheaper," a friend asked me the other day.

"The answer is well worth the price asked," I told him. "It takes a lot of extra expense and care to grow Registered and Certified seed, but I said, 'If you don't want to pay the grower for doing the extra work, why not do it yourself and save money?'"

"I had a seed field on my farm," I advised. "Choose five or ten acres of your best summerfallow, and then buy only a few bushels of the best Registered or Certified seed, and sow it on this small field, leaving an acreage bare all around it. Protect the field, reap it, harvest, thresh and special bin the grain with care, and you'll have your own seed, and sufficient seed for a large acreage."

"I've answered the friend's question of a lot of trouble though, isn't it?" "Well," I ventured to say, "That's right, but the trouble you must put up with is a lot of trouble to produce an extra good thing, or pay some one else to do it for you."

Following factors have tended to raise price: Seeding in Russia behind a year ago. No further permits for South African corn exports. Expect unusually small Italian corn crop. Risk insurance rates reduced. Threshing in Poland not up to expectations. Increased complaints of rust in wheat in Australia. Food grains in North-west India deteriorate owing to continued drought.

Following factors have tended to lower price: Rumanian endeavoring to sell substantial amount of wheat. Rains bring relief in Argentina. Official reports state conditions satisfactory. Food Research Institute has made 1938 world wheat yield may be greatest history. Corn yields in America active in Argentina. War possibilities fade and wheat offerings increase.

GRAIN NOTES IN BRIEF

Total deliveries of wheat in Western Canada at October 7th were 162,241,205 bushels. Alberta deliveries were 69,047,792 bushels.

Dry weather and hot winds have been prevalent over the wheat regions of Western Australia, South Australia and Victoria, so that wheat crops are started to deteriorate. A fair amount of moisture has been found up in the hills, but general rain will be needed shortly.

For some time Rumania has been conducting negotiations with England and Belgium seeking to effect large sales of wheat. For a time it was thought that effective arrangements could be made but it now looks like the plan has fallen through. Sales of Rumanian wheat in Britain have been hampered by the presence of many bugs in the early importations of wheat from that country.

The board of grain commissioners fixed a maximum lake freight rate of 7 cents a bushel for carrying wheat from the Head of the Lakes to Montreal and adjacent ports. Lake shipping companies are protesting against the limitation.

The feature at the Carbon Theatre this week will be Mark Twain's famous story "The Adventures of Tom Sawyer." This picture introduces to the public the new boy actor, Tom Kelley, who was specially picked for the part from thousands of applicants.

BUY IN CARBON

FAIL TO GET RABBIT LICENSES

Following a recent check by inspectors of the Department of Transport, Ottawa, four local citizens were hauled before the local magistrate on Monday afternoon, charged with failing to procure rabbit licenses. Fines of \$1.00 and costs were levied against the offenders, and a warning has been issued to all radio owners who have not done so, to procure their licenses at once if they wish to evade prosecution.

LITTLE ITEMS OF LOCAL INTEREST

Three car loads of C.G.T. members motored to Drumheller on Friday night to attend a rally.

Miss Dorothy Mortimer returned to Carbon last week after spending the past few weeks in the Okotoks district.

Mrs. Fred Gordon returned to her home near Carbon last week after a month's stay in a Calgary hospital due to a broken hip.

Mr. and Mrs. J. H. Oliphant were business visitors to Drumheller Monday.

Mrs. Simpson and sister, Miss Pearl Brishin left Carbon Wednesday night for Penitence, after making a couple of weeks holiday with Mrs. Harvey.

The Carbon Trading Company's big fall sale is now on and large crowds gathered at the Store Saturday to take advantage of the bargains.

Mrs. A.M. Gillespie of Kyle, Sask., arrived Friday and is visiting in Carbon with her sister, Mrs. M. Harvey.

Mr. and Mrs. A. F. McKibbin motored to Calgary Monday and returned Wednesday.

Hugh Brown has installed new scales at the Carbon Coal Co. Large trucks will not have any trouble now in weighing their load of seven tons or more, which is not considered too big a load for the modern 2 1/2 ton truck.

Joe Silver went into Calgary Saturday night and visited in the city for a few days with his parents.

A Castle in Wales

Property of Wm. Randolph Hearst Is Up For Sale

Down in South Wales on a promontory overlooking the Bristol Channel is a beautiful old castle, which has been turned into a most luxurious modern residence. It is called St. Donat's, and it belongs to William Randolph Hearst. He bought it some 13 years or so ago just from a picture he saw of it in an English magazine, it is said—and he spent what would be a fortune to anyone else in modernizing it.

Now he is trying to sell it, having paid it off in the meantime hardly more than half-a-dozen visits of a fortnight or so. It seems a very small return in enjoyment on so vast an outlay.

WORLD HAPPENINGS BRIEFLY TOLD

A decree issued in Vienna forbade Jews to attend any public sports events as spectators.

Lord Hawke, 78, famous old-time Yorkshire bowler and noted cricket authority, died in London recently.

The Countess of Ashburnham died at her home in Fredericton, N.B., following a heart attack.

The German government decreed the reichsmark henceforth would be the legal currency of the Sudeten territory.

Twenty persons were killed when a Belgian airliner took a wing in mid-air and fell in flames near St. in, northwestern Germany.

The agriculture department estimated this year's United States wheat crop at 940,226,000 bushels.

Corn production was forecast at 2,459,210,000 bushels.

Bones of a giant horse and dwarf infant were discovered in South Africa, caves by scientists seeking further trace of man's purported ascent.

Sir Kingsley Wood, British secretary for air, announced establishment of a new £1,000,000 (\$3,000,000) aircraft factory and expansion of existing production facilities for military planes.

D. de Waal Meyer, first accredited representative of the Union of South Africa to Canada, has arrived in Ottawa to assume his new duties. His position is substantially the same as that of high commissioner.

Locates Planes Off Beam

Device Permits Air Base To Immediately Inform Pilots Of Position

The close link between communication and transportation was shown when Dr. P. B. Jervis, president of the Bell Telephone Laboratories of New York, when in an interview at Toronto, he announced development of an instrument which would make possible immediate location of aircraft which have flown off the radio beam they have been travelling.

The device, activated by a cathode ray tube, he stated, shows the location of airplanes in relation to their direction from the point where it is stationed. Although confined to laboratory experiment thus far, its performance has been faultless under the most rigid tests, and he believed it would be widely adopted in the field of commercial aviation if further tests bore out its efficacy.

A quantity of the instruments, he understood, was on order with Trans-Canada Airlines, and he expressed the opinion that, "unless we find some bugs in it," the device would play an important part in assuring the safety of airline ships and passengers.

At present, he explained, pilots who have flown off the beam, particularly in the vicinity of airports, where the "cone" of radio waves may be difficult in learning their positions. The new device consists of a frosted glass "dial" marked in quadrants of a circle. The moment the lost aircraft begins operating its radio transmitter a spot of light appears on the dial, pointing out the direction of the aircraft from the landing field. The equipment is designed to be housed at the air base.

By using two such instruments, he explained, cross-bearing can be taken on the aircraft, and the pilot may be informed almost instantaneously of his exact location.

Doctors and preachers have the same trouble. They can't do much for people who think they know everything.

For crystals five to 10 inches in diameter have been found in the Antarctic.

When danger threatens, the parent preys on its young under the wings and dives under them.

Money Was Not Wasted

Britain Does Not Regret Millions Spent On Preventing War

It is reported from London that the British Government spent £40,000,000 (\$200,000,000) on military preventive measures during the Sudean crisis. The public felt that the money was not wasted.

In one respect it was. On the surface, at least, it was money well spent. Yet the expenditure of that sum probably prevented a war which would have cost billions of dollars; the treasury and emptied the pockets of every man, woman and child in the country that would have left the country so economically flat that it might not recover for a hundred years.

The preliminary preparations for war cost the country £200,000,000 without a shot being fired. Over a term of years the Great War cost Britain \$5,000,000,000. Similar preparations must have cost France, Russia, Czechoslovakia and a number of small adjacent countries several hundreds of millions in the aggregate. But it was money well spent.

On one side was an array of forces which would have struck with terrible effect. On the other side had not matched it with even greater forces. The result was the countries threatening war were afraid to strike and there was no war.

Yes, the money spent by the non-aggressive governments was well spent.—St. Thomas Times-Journal.

Chewing Gum

Now An Integral Part of Royal Air Force Rations

Chewing gum which started British jaws clicking seventy years ago has made a sponsored public appearance in a showcase at the Imperial Institute's galleries in South Kensington.

The dissolute masticatory once called a "hearty American habit" has been dignified as an integral part of the Royal Air Force emergency ration and a muscular stimulant used by long-distance flyers to keep them alert.

The exhibit appears in the British House of Commons, the evolution of the gum habit from its source in the dark forests of tropical Honduras to shop windows in the United Kingdom. Gum is used in hospitals in London for gastric complaints, some mouth and throat troubles and in the recovery stages of some children's ailments.

Gum chewers can be seen in London's streets, but the British chewer doesn't snuff it.

An economist remarks that the trend of modern invention is to make work lighter. Personally, we would like to hear of one that will make a worker work.

Brosnan has changed the surface of the earth more than the comets effects of earthquakes, volcanoes, tornadoes, landslides and glaciers.

An astrologer in London declares he has devised a system of backing race horses by the stars.

A JUMPER BROCK THAT'S NEWS

By Anne Adams

"What's the most popular juvenile fashion?" The answer, of course, is the jumper dress and T-shirt. The newest, sweetest edition of them all is the one for the little girl. The new 4859 immediately, and you can make up several versions in time for school days. There's a Sewing Instructor included that explains asymmetrically what to do and when, so it's simple to stitch up this jaunty, hand-type jumper, and blouse! For the classroom choose warm flannel serge. Daughter will beg for plenty of cotton blouses to be "changed into."

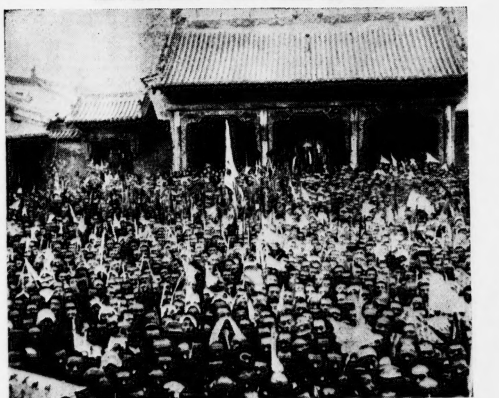

Pattern 4859 is available in girls' and women's sizes 6 to 16. Size 12, jumper takes 2 1/2 yards 36 inch fabric; blouse, 1 1/2 yards 36 inch fabric and 1/2 yard ribbon.

Send twenty cents (20c) in coin (please cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg, Newsworld, Inc., 172 McDermott Ave. E., Winnipeg.

About one-half of the population of Canada is found south of the northernmost point of Minnesota.

According to scientist the human heart contracts 100,000 times daily.

THE WAR IN CHINA — FORMER REBELS NOW LOYAL

Life with the Eighth Route Army in Hopei is illustrated in this photograph. The Eighth Route Army was formerly the Communist Army which waged war against the Central Chinese Government for ten years, but in 1947, after the Chinese Civil War, it was reorganized as the Chinese People's Liberation Army.

SUNDAY SCHOOL LESSON

OCTOBER 23

OUR DAY OF REST

Golden text: Remember the sabbath day, to keep it holy. Exodus 20:8.

Lesson: Exodus 20:8-11; Isaiah 58:13; Luke 13:10-17; Galatians 4:1-11; Colossians 2:14; Revelation 12:10.

Devotional reading: Psalm 81:1-4.

Explanations and Comments

The Fourth Commandment has right here—the meaning of the word rendered Sabbath in verse 31 is to separate; the Sabbath day is to be separated from other days in the way it is spent.

Six days shall thou labor, and do all thy work. There are many persons whose difficulty in keeping this commandment lies right here—they are too lazy to work the six days. The commandments lay stress upon working as well as upon resting. "Every man is as lazy as he dares to be" is an oft-repeated saying which is without some measure of truth. "Life without labor," declares Ruskin. The tragedy of many a life is that time is not left to be a trust for whose use one must render account.

The seventh day is to be distinguished from other days by abstinance from labor. "The Sabbath was made for man," declared Jesus, as we learned in a lesson last week.

The reason given here for the distinction to be made between the first day and the seventh day is that the first day was created for rest and the seventh day was created for labor. "The Sabbath was made for man," declared Jesus, as we learned in a lesson last week.

The reason given here for the distinction to be made between the first day and the seventh day is that the first day was created for rest and the seventh day was created for labor. "The Sabbath was made for man," declared Jesus, as we learned in a lesson last week.

Sir Horace Wilson

The Man Who Took A Hand In The European Crisis

In days of appallingly European diplomacy a mild little man, immaculately dressed and beside Neville Chamberlain in the careful councils of the British Cabinet and at times first to Germany as the Prime Minister's personal emissary to Adolf Hitler.

The role of Sir Horace Wilson has been somewhat mysterious since he was drafted two years ago "for personal service to the Prime Minister."

Political circles say that "personal service" now includes foreign affairs and that the "mysterious H. J." is Chamberlain's most influential adviser and "personal brain trust."

It's common talk that the blue-eyed, round-headed little man of 56 has taken a hand in the Central European crises.

Sir Horace entered the civil service in 1905 at 29 a year. He was not a university man and apparently was to stay in the "second division" of his life. But he was noticed by a former industrial commissioner who got him a place in the new labor ministry in 1919.

Wilson made a record as a strike mediator.

Shortly after the close of the war, an important strike drew comment from Prime Minister Lloyd George. "What happened to our strikebreaker?" the Prime Minister inquired.

Told that Wilson wasn't working on strikes, Lloyd George changed things. In 1921, Wilson became permanent secretary of the Ministry. In 1924 he was knighted.

He became known as the mildest, most patient labor mediator in history. Both workers and employers liked him. When the depression came, Prime Minister Ramsay MacDonald made him chief industrial adviser.

Sir Horace then sweated through problems of floundering industries; got them more capital if he felt them to be deserving; he moved colonies of workers to more prosperous towns.

Then Neville Chamberlain brought Sir Horace to Downing Street, the middle of the Empire. When Mr. Chamberlain became Prime Minister, Sir Horace was at his right hand.

"Meandering river" is the land bordering rivers or lakes with irregular shores which are likely to change in time.

Turkey has constructed 15 miles of railways and 75 bridges since 1925.

Orchids seeds are so tiny that hundreds of them could rest on a pin head.

TO DELVE INTO MARKETING OF WESTERN WHEAT

Winnipeg—Premier John Bracken at Manitoba announced his government would move shortly for an international conference on the marketing of western agriculture products. The meeting would be held in Winnipeg, the date to be set later.

Mr. Bracken said outstanding Canadian and United States authorities would be invited to attend and special emphasis would be placed on the problem of marketing wheat. The conference also would consider the marketing of cattle, hogs, butter, honey, poultry products and fish.

It is hoped representatives of leading wheat-exporting countries and an authority on European markets will be able to join discussions.

"The price situation which now exists warrants the most serious consideration of every Canadian," the premier said in announcing the conference. "With No. 1 Northern wheat worth a little over 60 cents per bushel, only seven cents a bushel more than the average for 1932-33, the worst year that we experienced during the depression, the future trend of prices and markets and what to do about them becomes of paramount importance."

"In terms of gold, present prices of wheat are not very far from the levels established at the low point of the depression in December, 1932. The 80-cent price for wheat this year established by the wheat board and the Dominion government has saved western Canada. But what of next year and the years that will follow? The situation is a challenge to western agriculture and a challenge to the nations as a whole. Adequate markets for our surplus agricultural products are absolutely essential to the economic well-being of Manitoba and other western provinces and the Manitoba government feels that the time has arrived when the whole question of wheat should be considered in the light of our experience since 1920, and in the light of more recent developments."

"The situation is forcibly brought home to us in western Canada this year when larger wheat crops in the United States and Canada and fairly substantial production elsewhere, has not been accompanied by a corresponding improvement in international demand for wheat, with the result that prices are now about half the level of a year ago."

"The economic development of Manitoba and of western Canada has been such as to yield large export surpluses of farm products. To project the west extensively into the field of international trade and consequently we must give much more serious consideration to our export position and the basis of our trade with other countries."

"The conference will not be restricted to wheat but will include consideration of the problems associated with marketing surpluses of cattle, hogs, butter, honey, poultry products and fish. Outstanding Canadian and United States authorities will be invited. We will expect representatives from the other leading exporting countries, and if possible an authority on European markets."

Gas Price Reduction

Would Save B.C. Consumers \$500,000 A Year

Victoria—British Columbia consumers will save roughly \$500,000 a year for every one-cent reduction in gasoline prices ordered by the provincial fuel commission, an unofficial estimate indicated.

Dr. W. A. Carothers, former University of British Columbia professor and chairman of the fuel commission, said he would order a reduction in gasoline prices within 10 days. The order is subject to approval of the provincial cabinet.

Plan Operating Again

Ottawa.—The farm placement scheme that last fall and winter put 2,000 persons, the vast majority single men, on farms in Canada's four western provinces is operating again. Placements this year are expected to be reduced somewhat because of the generally brighter western picture.

Reminder From Britain

London.—The British government has repeated its "reminder" to Japan that British commercial interests in Hong Kong and extrajurisdiction should be respected. The British ambassador at Tokyo, Sir Robert Craig, informed the Japanese government of the British attitude "within the past few days."

Warning From Japan

Ask Tokyo—U.S. To Give Her "Free Hand In China"

Tokyo.—The Japanese government urged Great Britain, the United States and other powers to "refrain from any possible move to send troops, warships and aircraft to south China" in view of the landing of a Japanese expeditionary force, presumably for a drive on Canton.

Notes were sent to the Tokyo embassies of the principal powers asking for cooperation in preventing incidents in connection with the south China campaign.

The notes designated the area between Swatow, 200 miles northeast of Hong Kong, and Pakhoi, about 300 miles southwest of that British colony, as the area in which neutral powers were to refrain from moving their forces. Japan asked that 10 days' notice be given the Japanese command if "other necessary" should compel such movements.

Statements issued by the foreign office expressing the hope the power will show "good sense" in keeping hands off Japanese activities in the south China area, were directed primarily at Great Britain, who for more than a century has been the dominant foreign force in the Pearl River valley, commercially controlled and dominated by Hong Kong.

At the navy ministry no effort was made to conceal the fact the new campaign will be on a major scale and will involve large forces of the Japanese army, navy and force.

The foreign spokesman said today Japan hoped the powers would control the movements of their own forces in the south China area and expressed hope no "complications" would ensue.

There was some reason to believe the Japanese hoped for a rapid and relatively painless conclusion to the southern campaign. That is why they officially termed it a "purely military" operation, signifying thereby that they do not intend to occupy south China, nor, consequently, as they have attempted to do in the north.

Forest Fire Havo

Death Toll In Ontario And Minnesota

Port Frances, Ont.—Planning forests filled the night sky with a red pall of smoke over northwestern Ontario as fresh outbreaks caused anxiety to weary fire fighters. But forestry branch officials said the region, which already claimed 20 lives, was under control.

Eight women and 25 children were housed in a hotel at Stratton, 40 miles west of Port Frances, after they were advised to leave their homes. They will remain outside the danger zone until the menace is past.

A report said the town of Devlin, 25 miles west of Port Frances, was threatened by a fresh outbreak but provincial police here said the information was that Devlin was in no danger.

The fire menace cut a swath 50 miles west of Port Frances and 30 miles deep, stretching into a service club address. The loss of thousands of dollars' worth of timber and cut pulpwood went up in flames. Beautiful farm houses, settlers' cabins, schools and stores are mere clumps of ashes.

Four bodies were found on the burned-over ground in Dance township, being the death toll in Ontario and Minnesota to 20. Twelve young children, three mothers and two died in Dance township, 50 miles northwest of Port Frances and centre of the holocaust.

Russia's New Defence Line

Is Being Constructed Along Western Frontier, State Report

Washington.—Reliable reports that Russia is hastening construction of a vast anti-aircraft and land army line along its western frontier as a first line of defence against Germany have reached diplomatic circles here.

The information is that Russia, seeing the collapse of its efforts to force an international barricade eastward around Germany, have dropped everything else in order to protect the Ukrainian wheat and coal fields from invasion.

A six-point program designed to slow down and finally halt an approaching army have been developed providing for defence of distance and lack of communications.

Plans Apartment Centre

Winnipeg—Plans for a low-rental apartment centre, comprising 474 units and costing about \$1,400,000, were outlined by Mayor John Queen in a service club address. The scheme, Mr. Queen said, would be financed by loan from the Dominion government. The Winnipeg would take 35 years to pay for the building. Mr. Queen's plan will be submitted to city council.

To Prevent Rust

Dusting With Sulphur Results In Higher Yields

Winnipeg—Sulphur dusting of test plots of Thatcher wheat to prevent rust, resulting in higher yields and better grades, was outlined here before the annual meeting of the committee on grain statistics. Dr. W. J. Geddes, grain research chemist of the board of grain commissioners, and L. H. Newman, Dominion cereals officer, outlined the experiment, reporting the favorable reaction and improvement in color of Thatcher wheat, a rust-resistant variety.

Dr. Geddes said control of export standards of Canada's wheat has improved in the past two years and attracted favorable attention overseas. The crop this year is more uniform and better balanced than last year's crop, when drought effects were marked.

Ripened kernels characterized by a bronzy or brassy color was a peculiar condition found in this year in wheat susceptible to stem or leaf rust, he said. The sulphur-dusting experiment improved color.

NEW FRONTIER IN CZECHOSLOVAKIA BEING DETERMINED

London.—An official map received in London disclosed Chancellor Hitler had carried his new frontier with Czechoslovakia forward to lines corresponding roughly to those of his Godesberg demands.

The new frontier gives Germany an area approximately equal to that of the Godesberg demands, but only in a few cases do the lines coincide with the Godesberg lines. There are variations of five to 10 miles either way throughout, some favoring the Czechs as compared with the Godesberg map.

At the Munich conference and afterward it was asserted in British quarters that Hitler had not gained all he asked of Mr. Chamberlain at Godesberg on the Rhine on Sept. 22.

The big four at Godesberg—Chamberlain and Premiers Daladier and Mussolini of France and Italy—turned over to the commission the task of drawing the limits of the fifth zone. The commission consists of a German foreign office official, an Italian, a British, a French and a Czechoslovakian.

Germany's biggest gain, according to the commission's map, was made north of Prague, where the final frontier put the border only 25 miles from the Czechoslovak capital and 10 to 15 miles south of Godesberg line.

On the other hand, the Czechs gained near Plzen, where the frontier will not enter the actual town as was expected to do. Similar changes from the Godesberg line favoring Czechoslovakia appear all along the south and southwestern frontier.

Another German gain is to the west of Malchitz-Ostau, in northern Moravia, where the line passes through a large area in which Hitler originally demanded a plebiscite.

The feeling is growing in informed London quarters that Germany might be satisfied with the Czech concessions already embodied in the fifth zone and that plebiscites in additional territory might be waived.

The commission's map, however, showed areas in which plebiscites might be held.

ROYAL TOUR

The King and Queen plan to visit Canada early next summer and spend about three weeks in the Dominion.

Seeking Trade Agreement

Germany Anxious To Negotiate For Treaty With United States

Ankara, Turkey.—Walter Funk, German economics minister, announced he intended to start trade negotiations with United States. Funk left for Berlin after concluding a trade agreement with Turkey.

In line with Germany's effort to line up southeastern Europe into her economic orbit, Funk negotiated a German credit of 150,000,000 marks (approximately \$60,000,000) for Turkey.

Germany expects to supply materials for new railroads in eastern Anatolia and for new factories for production of munitions, airplanes, heavy chemicals and synthetic gasoline.

The German agreement with Turkey rivals an earlier credit of £16,000 (\$80,000,000) granted Turkey from Great Britain before the Munich agreement, dismembering Czechoslovakia.

Washington.—Officials handling United States foreign commerce said the United States would welcome a trade agreement with Germany, but not on the basis of the German system of trade.

Looking Forward To Trip

King George And Queen Elizabeth Anxious To See Canada

Ottawa.—The King and Queen are "greatly looking forward" to their visit to Canada next summer, his majesty said in a reply to a cable from Lord Tweedmouth expressing the joy of the Canadian people in the coming visit. The messages were made public here.

The Governor-General cabled the King: "The Prime Minister has asked me to send to your majesty and to her majesty the Queen, with my humble respect, an expression of the great pleasure felt by himself and his colleagues at your majesty's gracious consent to visit Canada next year."

The Prime Minister wished me to assure your majesty that this news has been received with the most profound gratitude and joy by all our majesty's subjects in Canada."

The following reply was sent from Balmoral Castle: "The Queen and I much appreciate the message from the Prime Minister conveyed by you. Please assure him that we are greatly looking forward to making the acquaintance of Canada and her people."

VETERAN WESTERN PUBLISHERS

Winnipeg—The Winnipeg Free Press, the Manitoba Free Press, the Saskatchewan Herald and the Regina Leader-Post are the four western newspapers that have been published since the war.

Both got their start in Ontario, Mr. Dumbas as a writer and Mr. Stoddart with a Prescott weekly paper. This photograph was taken at the convention of the Saskatchewan weekly newspapermen in Regina.

To Reduce Expenses

Main Shops Of C.P.R. To Be Closed For Period Of Three Weeks

Montreal.—Main shops of the Canadian Pacific Railway Company throughout Canada will be closed for three weeks, Oct. 24 to Nov. 14, it has been announced.

The decision was disclosed in a brief statement made public by the company: "After a conference between the company's officers and representatives of its shop employees throughout the system, an amicable agreement was reached that all main shops will be closed for a three-week period."

The announcement was made following a closed conference between company officers and representatives of 12,000 unionized shop employees who had been advised of plans for a part-time layoff to reduce expenses.

Committed For Trial

Levels Telephone Operator Charged With Telling In Air Raid Alarm

London.—A telephone operator, William Wood, 26, was committed for trial at Leeds on a charge of public mischief, specifically telephoning a secret code warning of an "air raid" in the recent international crisis.

Threats of defence workers' picket of bed around midnight that night and 60 air raid precautions centres, police stations and fire departments in West Yorkshire prepared for action. The summons was a house.

"The people of Great Britain feel that war can be avoided only with the aid of its real ally—that is, the German people. The people of Great Britain have no axe to grind with the German people, but only for the present Nazi regime, which they deeply distrust."

"The people of Great Britain are champions of liberty. . . The British Empire is composed of men of many races and many creeds. The principle of the empire is that the same law shall be applied to all men, whether they be of any race, any religion, any sex, any age."

"The Nazis believe there is only one race worthy of possessing the world. They have invented a race which they call the Aryan race, and which race scientists do not recognize. This Aryan race, say the Nazis, has the right to rule the world."

"The Nazis reject charity, grace and humility and declare them imported from the Orient. They claim the race to which the founder of the Christian religion belonged and declare it unworthy of enjoying the first place in the world."

"It is therefore difficult to see how peace could ever result between the Christian people and the Nazis. But, believe from the depth of my heart that peace can reign among all civilized peoples."

The same newspaper made the first reference in Vienna newspapers to the "incidents on Saint Stephen's Place" in a report of a Nazi party meeting speech by burgomaster Hermann Neubacher. The burgomaster rebuked the cardinal for a remark that there still are young people who are too easily tempted to listen to deceitful catchwords and hypocritical rhetoric."

"We are going on our way even without the consent of the last adherent of Austrian clericalism who has not found his way over to us in this time."

"We do not intend, however, to stop ourselves to be continuously in a state of anger. An end must be put to the methods of the Herr Cardinal which first shows a velvet hand in readiness to talk things over and then incites political quarrels."

This was taken as a reference to Hitler's visit to Chancellor Hitler immediately after Anschluss of Austria and Germany last March and his letter to Nazi officials which he signed "Heil Hitler"—a departure from the custom of German bishops. He also urged Austrian Catholics to unite for Anschluss in the plebiscite that followed.

"We do not wonder that people reacted with 'loud ill-humor' to the Cardinal's sermon, Neuschichtchen went on."

"It is especially bitter to us that a high Catholic official showed and hopes to attack the Führer in an indirect way in a speech before a group of dozen unnamed Catholics, organized a silly expression and provoked the people at the very moment our troops were taking possession of the Sudetenland—land liberated by the Führer in the name of the Reich and the German community."

The editorial was not only evidence of Nazi disapproval. The last issue of the Kirchliche Wochenschrift, a diocesan publication displayed on bulletin boards outside churches, was seized. No reason was given for the confiscation. The issue of church paper usually contains nothing more than short notices to parishioners.

FACTORS THAT WORK AGAINST PEACE OF WORLD

Paris.—The German language weekly newspaper Die Zukunft carried an article signed by Alfred Duff Cooper in which the former first lord of the admiralty declared Germany's Nazi regime prevented German and British people from working together for peace.

The article, featured in the anti-Nazi weekly's first appearance in Paris, said many in both France and Britain believed Prime Minister Chamberlain gave in too much to Chancellor Hitler in the Czechoslovak crisis.

"It is difficult to see how peace can reign between Christian people and the Nazis," wrote Mr. Duff Cooper, who quit his British cabinet post in protest against Mr. Chamberlain's foreign policy.

"But I see at the bottom of my heart that peace can reign between all civilized peoples."

The article continued: "The English people look to the future. They are aware that Chancellor Hitler, whose demands are insatiable, is not only a danger to the world but also a danger to the British Empire."

"The people of Great Britain feel that war can be avoided only with the aid of its real ally—that is, the German people. The people of Great Britain have no axe to grind with the German people, but only for the present Nazi regime, which they deeply distrust."

"The people of Great Britain are champions of liberty. . . The British Empire is composed of men of many races and many creeds. The principle of the empire is that the same law shall be applied to all men, whether they be of any race, any religion, any sex, any age."

BIG INCREASE IN LICENSES

Gains in motor licenses in this province in 1933 is reflected in figures issued recently by the provincial government.

For the six months ended September 30 there were approximately 82,000 licensed passenger cars in this province, a gain of some 1,500 over the total for the whole of the year previous. Not only cars but also motor trucks showed substantial gains.

There was such an increase in car licenses this year that there was but a slight demand for licenses when they became available at the reduced 40 per cent rate on October 1. This reduction has been extended to motor trucks on September 1.

Licenses taken out at the reduced rate will be good until the end of the present fiscal year on March 31, next.

For those turning in their car license plates by the end of December, 1933, there will be a rebate of 20 per cent of the annual license fee. Last year these rebates amounted to about \$30,000.

Officials of the Alberta Motor Association are delighted with the increase in passenger licenses as this result was predicted by the association during its successful campaign to have the license year open on April 1 instead of January 1 in each year.

Two old ladies were talking of modern fashions. "Why, I can think of the hats the boys wear," Mrs. Smith said. "Mrs. Smith," they said, "I can wear hats they just walk alongside of them nowadays."

ACRES and SAVINGS

Substantiate D2 Expectations

DIESEL TRACTORS

When the "Caterpillar" D2 Diesel Tractor was introduced early this year, farmers based their expectations largely on the "Caterpillar" reputation. Now, however, records and figures are available which provide indisputable evidence of D2 performance and economy right here in Alberta. An example is that of Larson Bros., of Irma.

From June 14 to September 1, Larson Bros., operated their "Caterpillar" D2 Diesel Tractor for 720 hours. They broke 100 acres, summer-fallowed 400 acres, disced 500 acres, cut 250 acres of crop with binders, and graded two miles of highway. Fuel consumption averaged only 1 1/4 gallons per hour of 11c fuel.

Implement included 4-11" bottom moldboard plow, 9-foot lift-combine, 14-foot single disc, and two 8-foot binders.

"Our 'Caterpillar' D2," state Larson Bros., "is doing all the work on two farms, replacing one 15-30 wheel tractor and 33 horses. We are doing a great deal more work than formerly, and find that our 'Caterpillar' D2 not only does the work more efficiently, but much easier and faster in addition to cutting our operating costs 75%. We have used five different makes of wheel tractors, but our 'Caterpillar' D2 Diesel Tractor is so far ahead of them in every way that there just isn't any comparison."

that FISH smells good!

DRESSED FILLETS OF HADDOCK

- 1 cup of milk
- 1 tablespoon of mustard
- 2 cups of ground old Canadian haddock
- 2 eggs
- 1/2 cup of fresh chopped parsley

Prepare a white sauce with the milk, the mustard, and the ground haddock. We use the slices with a dandy cloth, cut in individual pieces, serve each piece with the cheese sauce, sprinkle with chopped parsley, and cook 20 minutes in moderate oven. Fillets of not other kind of Canadian Fish may be used and named as Haddock fillets.

THE KIDDEES' EYES will sparkle when you bring in an appetizing platter of Fish. It's a dish fit for a king, with its delicious, palate-pleasing flavour... yet so inexpensive that you will have money left over for extra meal-time treats.

You can enjoy Canadian Fish and Shellfish all the year 'round — over 60 different kinds — fresh, frozen, smoked, dried, canned or pickled... as often as you wish. Many tempting recipes make it easy for you to offer delightful variety to hearty appetites.

ANY DAY A FISH DAY

Snicklefritz----

John: "Who was the new girl with you Sunday night?"

James: "She wasn't new—just my old girl painted over."

Alvin: "If you refuse me, Irma, I shall never love another."

Irma: "What will you make the same promise if I accept?"

Of the "Give-me-a-straw-with-the-word" jokes we have heard, we give the prize to the lad who put off-ferment and full-stick in one sentence. He said: "Effervescent enough covers on the bed your fiddly stick out."

"Don't put off till tomorrow, son. The things you can do today."

"Then Mr., let's finish up that pi."

And it is right away!

Bobbie: "My father's a policeman. What does your father do?"

Charlie: "Whatever Mr. tells him."

Arthur: "So your new job makes you independent?"

Albert: "Absolutely. I get hers any time I want before 8 and leave just when I please after 5."

"How is old Bill these days?" asked one club member of another.

"Oh, he's much better since his operation," was the reply.

"Operation? I didn't know he'd had one."

"Oh, haven't you heard about it? They've removed a brass nail that has been pressing against his foot for years."

Horsie: "If you loved me, why did you refuse me at first?"

Maudie: "Just to see what you would do."

Horsie: "But I might have rushed off waiting for an explanation."

Maudie: "Hardly. I had the door locked."

"What do you want?" demanded Harvie. Breakfast or work?

"Both," replied the woman.

Harvie produced a large slice of his wife's home-made bread. "Eat that," he exclaimed, "and you'll have both."

WORKERS FOR
WORLD PEACE

Although we follow with our hopes and our prayers the efforts of the many sincere workers for peace in the world today, we sometimes wonder why such endeavor should be necessary. We feel sure that the average man and woman in other countries are like ourselves. They want no war.

Has it occurred to you that many of these peoples, peace loving though they may be, are deprived of the information that would enable them to choose wisely their course of action? Instead of news they are given propaganda. The facts are colored or misrepresented or suppressed. They have been robbed of the right to think for themselves.

Perhaps a permanent peace could have no better practical foundation than a free press throughout the world. We who have free access to all the news, take it for granted and treat it lightly. Yet, having this pledge of freedom, we should cherish it, bringing our children up in the knowledge and appreciation of this safeguard to their liberties.

Use your opportunities to be fully informed on all matters that affect your life. Give your family the benefits that a good newspaper can bestow.
